The Problem

Too many Decisions and Action Items are decided and assigned to people upon in meetings but never happen.

The Solution

An **innovative web platform** that communicate decisions, action items, protocols, and meeting summaries, synchronize teams, tasks, schedules and track completion statuses in real-time.

Go to Market

We will use our long-established connections with more than **30 international companies** that are our long-standing customers to upsell to them this new platform and will use those sales as references and starting points for selling in the US and Europe through software distributors and market places.

Seed investment of to start selling in North America and Europe.

\$1.3M

Required funding

Get it done!

- ✓ We plan to continue the development to phase 2 that will contain integrations to other solutions and automate meeting content entry without typing.
- ✓ Create significant exposure on the social media.
- ✓ Explore the possibility of incorporating our product in OEM offering such as Teams, Zoom and WebEx.

Market Size

We estimate the TAM as **150 Billion dollars**. This number is the sum of tens of millions of management work hours wasted every day chasing reports & updates on action items & tasks completion.

Founder & CEO

Pnina Zinger

Has been working for **20 years** with Israeli and International companies on Project Management and Knowledge Management projects.

She has assisted thousands of teams in Israel and abroad in establishing better work processes and in getting more things done on time and on quality.
