

In recent years, Algorithmic trading is on the rise and its changing the trading landscape everyday.

A full ML/DL Trading solution is not yet to be introduced to the market participants.

In the US, there has been **200%** growth of trading platforms growth, and machine learning algos increase by **30%** - we believe these numbers will continue to grow.

Problems & Solutions

ML/DL pipelines are hard to build requiring complex integrations and architecture of DevOps and modeling

Our solution does not require any coding skills but basic knowledge is needed

Manual trading is time consuming, requires maintenance, and is costly

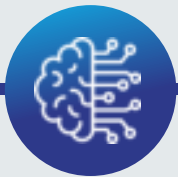

Our solution is constantly updated as automated strategies are leaning continually, its simple, fast and cost effective

Long process of finding alpha strategies

Our solution provide fast prototyping & deployment of deep learning models

Technology > Create & Launch

Neural networks to analyze data, features and sentiment content

Innovative UI/UX for building strategies

Configurable widgets & 3rd party API

Tailored per user dashboards

On-premise self-contained solution

Automated trading platform DL & ML enabled

Simple one-click integration to any broker

Business Model > Monetizing the user base

- Selling subscription based access to their frontend platform & Community
 - A marketplace of sellers & buyers of DL/ML strategies
 - On-premise self-contained solution
 - 3rd Party Data providers

DEC 2021

Phase 1 – Core Product

- All services are created
- Cluster is set up
- Basic Platform is ready to use
- User panel accepts payments
- Basic user management
- Billing

MAR 2022

Phase 2 - Win The Market

- Partnerships with the big Exchanges
- machine learning predictions and charts
- On-premise solution for banks
- Advanced walkMe solution
- Statistics

JUL 2022

Phase 3 – Market Ready

- Marketplace ready
- 3rd Party Data Marketplace
- Personalized User Experience
- Paid plans management (UserPanel)

DEC 2022

The Fully Custom solution

- Fully Automated Compliance
- More Integrations, More API's
- Improvements according to the market feedback
